

Flightlog is a complete online UAV management system designed to help you to keep track of your company's pilots and UAVs and covers all your needs and requirements for maintaining a safe and reliable UAV operation.

Why use Flightlog?

Flightlog can be accessed anywhere in the world where Internet access is available. No need to carrying around loose-leaf paper anymore because Flightlog works perfectly on a laptop, tablet or desktop and is very simple and intuitive to use.

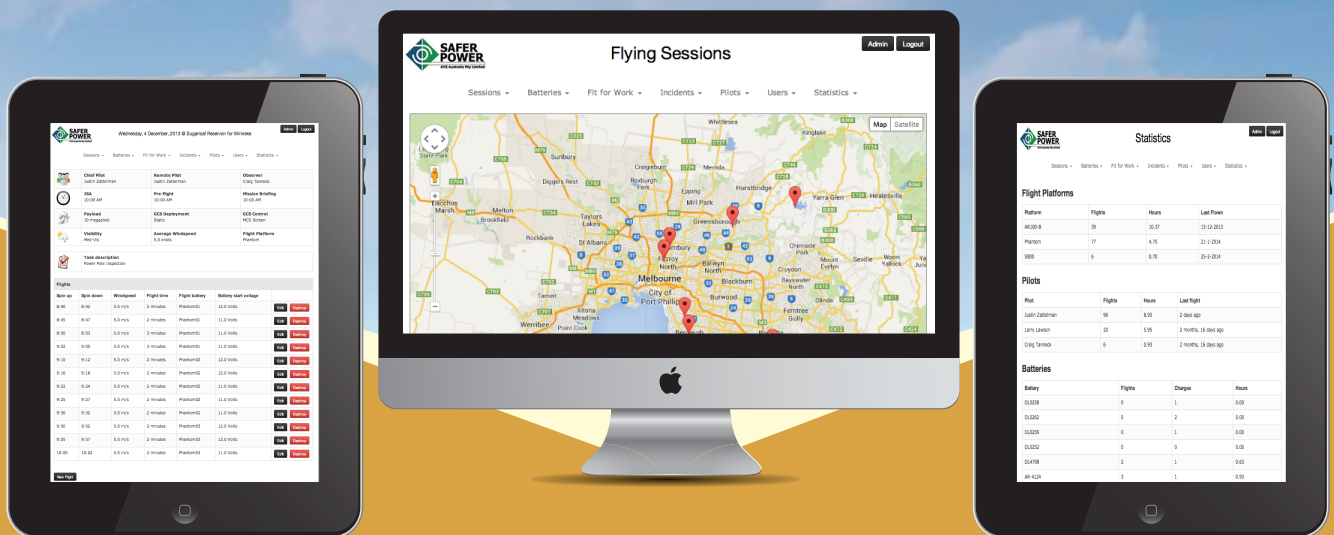

Would you like to know how many times you've flown a UAV or how many hours you've used a particular battery? Flightlog does all the dirty work for you and then generates clean and simple reports.

Benefits of Flightlog?

Flightlog allows your pilots to enter information into a secure backed up database anywhere in the world at anytime. If your operation has multiple pilots and UAVs then Flightlog can take the headache out of maintaining accurate flight and maintenance records. With Flightlog you are always up to date.

Flightlog also helps you manage the pilot health and risk of UAV failure by providing you with the following information.

- Pilot flying hours
- Pilot "Fit for Work" questionnaires
- UAV flying hours
- UAV maintenance
- Job Safety Analysis (JSA)
- Battery maintenance
